57A Sampaguita Street, Lopezville Subdivision, Brgy. Mayamot, Antipolo City, Rizal

Computer Engineer

As a professional, I aim to devise practical solutions that truly benefit the organization or clients. Upholding ethical standards is a fundamental aspect of my approach, particularly concerning the responsible handling of sensitive data and technology. I thrive in dynamic IT environments, collaborating effectively with colleagues of diverse expertise to achieve our goals efficiently. Additionally, my proficiency in clear communication allows me to explain complex technical concepts in a manner accessible to all stakeholders, regardless of their technical background, by integrating technical expertise with ethical principles, accountability, and teamwork. I endeavor to make significant contributions while maintaining a high level of professionalism throughout.

Professional Experience

Teleperformance Philippines (AT&T) | Operations Customer Expert | November 2024 – April 2024

- Provide customer support for AT&T Internet Air and Mobility Sales, assisting with technical troubleshooting, account inquiries, and billing concerns.
- Diagnose and resolve connectivity and performance issues with AT&T Internet Air devices, guiding customers through step-by-step solutions.
- Educate customers on network optimization, device compatibility, and service plans to enhance user experience.
- Utilize CRM and ticketing systems to log and track customer interactions, ensuring efficient resolution and follow-up.
- Collaborate with internal teams to escalate complex technical issues and provide feedback on service improvements.

Strongbond Philippines Inc. - IT Clerk | June 2024 - November 2024

- Documentation & Organization: Develop and maintain comprehensive IT documentation, ensuring files are organized for easy access and retrieval.
- Technical Support: Provide first-level technical assistance to users, troubleshooting hardware and software issues effectively.
- System Setup: Assist in the installation and configuration of new hardware and software, ensuring systems are secure and operational.
- Inventory Management: Monitor IT supplies, manage inventory levels, and coordinate with vendors for procurement and services.
- Compliance & Security: Ensure IT compliance with regulations, monitor system activities for security breaches, and implement measures to safeguard data.

AlconPH / ITSmart - Back-End Developer | October 2023 - March 2024

- Skillfully utilized Django REST Framework, PostgreSQL, and relational databases, demonstrating a

deep understanding and proficiency in backend development technologies.

- Led the creation of intuitive and efficient RESTful APIs, custom-tailored to meet the specific requirements and workflows of the Payroll System, ensuring seamless communication and data exchange.
- Implemented robust security protocols within the Back-End API infrastructure, incorporating authentication and authorization mechanisms to protect critical payroll information from unauthorized access.
- Executed comprehensive testing and optimization procedures, meticulously fine-tuning API performance parameters to guarantee consistent reliability and efficiency in processing payroll-related requests and transactions.

TIP - Quezon City March 2023 - May 2023 Information Technology Security Office

Laboratory Assistant - Internship

- Server Troubleshooting involves identifying and fixing hardware, operating system (OS) configuration, and application or service-related problems. This proactive approach helps prevent issues, downtime, and data loss by regularly monitoring, updating, and backing up essential data.
- Software and Hardware Testing, we evaluate hardware and software to detect and resolve any issues or flaws that could impact performance, reliability, or user experience. Thorough testing improves software dependability and ensures the delivery of high-quality programs with fewer bugs.

Education

Technological Institute of the Philippines - Manila June 2019 - September 2023

Bachelor's Degree in Computer Engineering

Our Lady of Perpetual Succor College June 2013 - September 2019

High School Diploma

Skills and Attributes

Technical Expertise

- Computer Troubleshooting: Proficient in diagnosing and resolving various computer hardware and software issues for a seamless user experience.
- Programming: Proficient in Python for Django REST Framework for Back-End

Development Key Attributes

- Analytical Accuracy: A meticulous approach to tasks ensures precision and reliability in all work undertaken.
- Attention to Detail: A keen eye for detail aids in identifying and rectifying potential issues early in the process.
- Rapid Learning: Quick learner, adapts swiftly to new technologies, tools, and concepts for efficient problem-solving.

Strengths and Expertise

Python Programming, Technical Expertise, Adaptive and Rapid Learner, Computer Troubleshooting, Git Version Control, Database Management System, Attention to detail, and Analytical Accuracy
